Mass shootings are on the rise. While we can't predict when and where, we, as full-time law enforcement officers working in the thick of threats, can help you better understand how to protect yourself, your loved ones and your organizations through effective and realistic training. The Survival Response program leverages our combined 40 years of law enforcement and tactical response experience, giving you the invaluable knowledge and tools needed to help prevent terror events and mitigate casualties should you be faced with an active shooter situation. Survival hinges on knowing what to do and when to do it. That's where our experience can save lives.
